Project Title: Lana Del Rey Website

I'd like to build this site with a glossary on the side (kind of like Table of Contents) rather than an individual having to scroll to the end to find out every information about the artist. I think there could also be pictures of the albums that when a user clicks on it, it could start playing a clip of a song from the album. I also would like to include a column with a picture of her and some basic biographical facts.

- **Brief Introduction** – introducing brief overview of Lana Del Rey as an artist and expressing how popular she is in the present
- **Early Life and Education**
- **Career**
- **Artistry**
  - Musical style
  - Influences
  - Voice and timbre
  - Videos and stage
- **Public image**
  - Early reception
  - Social views
  - Charity work
- **Impact**
- **Sources** – any other sources
